

Type 05

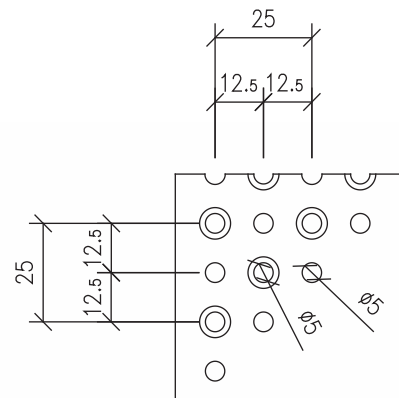

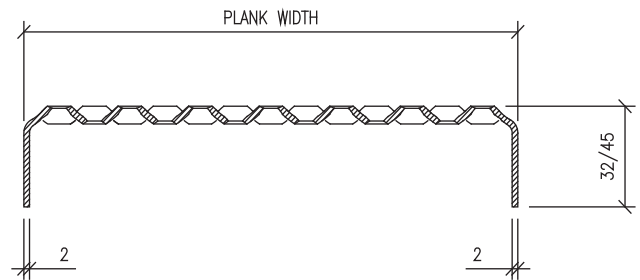

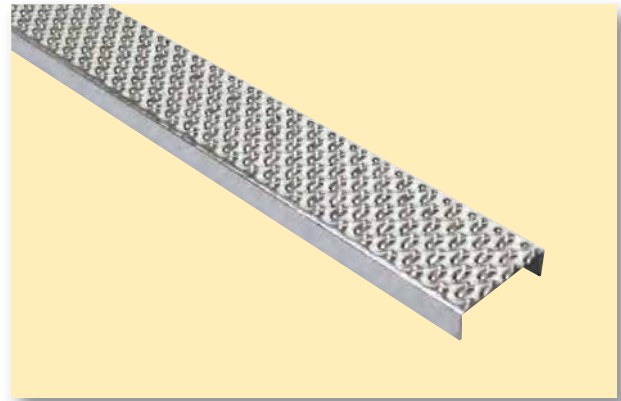

PcP Type 05 is our most popular and versatile product offering a number of advantages, many of which relate to safety which is of prime importance to designers, engineers and users worldwide.

Type 05 has small holes allowing solutions to both the engineering and architectural world. It also offers high slip resistance properties giving it a greater advantage to other products on the market.

05 gratings can be used typically in the following applications:-

- Public and industrial access walkways
- Heel proof areas
- Infrastructure overhead gantries and walkways.

Material is kept as a standard stock item, therefore making the product readily available for you to fabricate or for PcP to fabricate into suitable panel sizes.

Material: Mild Steel
 Thickness: 2mm
 Height: 32mm or 45mm
 Widths: See Table
 Hole Diameter: 5mm
 Drainage Hole Diameter: 5mm
 Finish: Mild Steel:
 Self Colour,
 Galvanised to BS EN 1461

Other materials available by special order.
 Please Contact Technical Sales.
